# Everyone

can make a difference

## The Disabilities Trust

The Disabilities Trust is a leading national charity, providing innovative care, rehabilitation and support solutions for people with profound physical impairments, acquired brain injury and learning disabilities as well as children and adults with autism.

People are at the heart of everything we do and our services across the country include purpose-built residential accommodation, community-based housing, respite care, special education and community enabling services to maximise each individual's independence.

## Physical Disability

The Disabilities Trust's Disability Services are the means by which we provide specialist services for people with physical disabilities including cerebral palsy, muscular dystrophy, spina bifida, arthritis, stroke, multiple sclerosis and disabilities resulting from accidents.

As well as providing physical care, we are committed to ensuring people have independence and control over their lives and are treated with dignity and respect at all times. Needs are individually assessed, and care is delivered in a person-centred environment, either in a service user's own home or in a community or residential setting.

## BIRT

The Brain Injury Rehabilitation Trust (BIRT) aims to provide the best quality neurobehavioural rehabilitation for people with complex and challenging needs after brain injury. BIRT is committed to seeking new and imaginative solutions to meet the needs of our service users. Our clinicians regularly carry out research, working in close collaboration with academic institutions on a range of projects.

## Autism

Autism is a complex disability and no two people have the same needs. Our detailed assessment procedure is designed by experts to determine the level of support needed by each individual. We are committed to finding new ways of understanding the views of those who have communication difficulties and tailor our communication methods to best meet the needs of that person.

Our range of person-centred services is designed to meet individual needs - from small community-based registered residential housing projects to long-term care and support in purpose-built residential centres.
